Sparta Evolution Full Big Brake Kit Application Guide
 Refined Strength – The Ultimate Braking Solution
 Updated July 1, 2017

Triton R Caliper Big Brake Kit

- Forged from Aluminum for strength and weight savings.
- Designed with a larger frame for efficient ventilation.
- Utilizes a standard FMSI pad shape.
- 15% lighter in average weight when compared to Triton Caliper.
- Available from a 4 piston variant up to a 6 piston variant.
- Quick release pad retainer pins expedite pad change times.
- Standardized features with through bolt system, castellated pistons, and Sparta Evolution's dual seal system (DSS).
- Available in Nickel Alloy coating with an optional upgrade fee of \$150.00.

Triton Caliper Big Brake Kit

- Forged from Aluminum for strength and weight savings.
- Designed with a larger frame for efficient ventilation.
- Utilizes a standard FMSI pad shape.
- Available from a 2 piston variant up to a 6 piston variant.
- Hard anodized finish is tougher and more efficiently dissipates heat from the caliper body vs powder coating or paint.
- Quick release pad retainer pins expedite pad change times.
- Standardized features with through bolt system, castellated pistons, and Sparta Evolution's dual seal system (DSS).
- Available in Nickel Alloy coating with an optional upgrade fee of \$150.00.

Saturn Caliper Big Brake Kit

- Forged from Aluminum for strength and weight savings.
- Designed with a larger frame for efficient ventilation.
- Utilizes a standard FMSI pad shape.
- Available from a 4 piston variant up to a 6 piston variant.
- Quick release pad retainer pins expedite pad change times.
- Standardized feature with Sparta Evolution's dual seal system (DSS).
- Standard offer in powder coating. Color options: Yellow, Blue, Red, Black
- Can be anodized like Triton, for an optional upgrade fee of \$150.00.

Notes

- Certain E36 M3 models may require minor modifications to the lower control arms outboard of the ball joint.
- The E39 M5 OEM wheels will not clear the Sparta Triton Series Brake system.
- The Honda S2000 models require the front of the body to be modified to a wide body fenders to allow lower offset wheels for brake caliper clearance.
- Many of the Sparta Evolution Big Brake Kits require modification to and or removal of the OEM dust shield or backing plate.
- Sparta Evolution Brake Systems are designed for vehicles at factory ride height. Increased ride height is not compatible with the supplied brake lines.
- Sparta Evolution Brake Systems need to utilize a minimum of an 18" Specifications wheel for clearance of the brake kit.

*Sparta Evolution reserves all right to change and or modify any part of this document as our current application lineup is constantly being updated to include new vehicle applications. Because U.S., state or provincial laws and regulations may prohibit removal or modification of components that were installed on vehicles by a car manufacturer to meet emission requirements or to comply with motor vehicle safety regulations applicable to vehicles manufactured for use on public roads. Sparta BBK is only for Race track or off-road competitive or performance use.
