Notes

- Certain E36 M3 models may require minor modifications to the lower control arms outboard of the ball joint.
- The E39 M5 OEM wheels will not clear the Sparta Triton Series Brake system.
- The Honda S2000 models require the front of the body to be modified to a wide body fenders to allow lower offset wheels for brake caliper clearance.
- Many of the Sparta Evolution Big Brake Kits require modification to and or removal of the OEM dust shield or backing plate.
- Sparta Evolution Brake Systems are designed for vehicles at factory ride height. Increased ride height is not compatible with the supplied brake lines.
- Sparta Evolution Brake Systems need to utilize a minimum of an 18" diameter wheel for clearance of the brake kit.

*Sparta Evolution reserves all right to change and or modify any part of this document as our current application lineup is constantly being updated to include new vehicle applications. Because U.S., state or provincial laws and regulations may prohibit removal or modification of components that were installed on vehicles by a car manufacturer to meet emission requirements or to comply with motor vehicle safety regulations applicable to vehicles manufactured for use on public roads. Sparta BBK is only for Race track or off-road competitive or performance use.
